**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of the method of use in Paper No. 3 is acknowledged. The traversal is on the ground(s) that the claims have now been amended and the apparatus of claims 1-11 have been added into the method claims. This is found persuasive because there is no longer a burden of search, and claims 15-20 will be grouped with claims 1-11

**Closer examination of the application has lead to further restriction of the application:**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11 and 15-20, drawn to an introducing device and method of use, classified in class 604, subclass 272.
- II. Claims 12-14, drawn to catheter, classified in class 604, subclass 272.

The invention are distinct, each form the other because of the following reasons:

1. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the apparatus in Group I and Group II may be used separately in other combinations or completely separately. The subcombination has separate utility such as: the introducer device may be used to hold

any tube flexible or nonflexible or needle; it may be used for biopsies, suturing, or other procedures. The catheter may be utilized for epidural in the field of anesthesia, by placing it in another catheter with a hard shell and a balloon and be used as a drug delivery device, aspiration of body fluids or monitoring body fluids.

2. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Mr. Mattson on 4-3-02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roz Ghafoorian whose telephone number is 703-305-2336. The examiner can normally be reached on 8:30am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Casler can be reached on 703-308-3552. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0858.
